

GIUSTINI / STAGETTI

GALLERIA O. ROMA

MIART

BOOTH O02

On the occasion of miart 2017, Giustini / Stagetti Galleria O. Roma presents a booth dedicated to the eternal city and the idea of a "Roman spirit" that, differently interpreted, emerges from the works of some of the contemporary artists represented by the gallery: Fernando and Humberto Campana, Paolo Canevari and Luisa Zanibelli.

Combining the baroque opulence of the furnishings by Campana, the rationalist attitude of the chairs and the vases made using the ancient technique of Etruscan Bucchero realized by Canevari, and the orientalism in Zanibelli's carpets, the project aims to restore an original and visionary portrait of the city of Rome and its stratified historical, artistic and architectural heritage, through powerful works made with high quality materials and the finest craftsmanship techniques.

The overall view of the works ideally outlines the topic of a possible design collection today: the classic reinterpreted by the sensitivity of contemporary authors.
